

EXPANDABLE SCUPPER PLUGS STAINLESS STEEL

IMPA CODE: 232481A- 232488A

TK Tools expandable scupper plugs are used for sealing scupper holes for spilled oil or polluted liquids. The plugs are inserted into the drain holes and tightened the handle until a slight resistant is felt. The rubber parts are made of oil resistant rubber. High quality stainless steel casting. Expending sleeves are of NBR oil resistant rubber. Sizes are in conformity with standard IMPA codes.
